Armin Zia

FULL-STACK SOFTWARE DEVELOPER
.NET, WEB AND MOBILE APPLICATIONS

<http://www.arminzia.com>

I live in Shiraz, Iran. I started programming computers in the early 2000's with BASIC and PASCAL. I continued on the PC with Visual Basic 6.0 and then VB.NET. I am now quite comfortable in VB.NET or C#. I'm currently learning Angular 4 and .NET Core.

I consider myself a reasonably experienced windows web software developer with a particular interest in the human side of software development. Computers are

fascinating machines, but they're mostly a reflection of the people using them. I build desktop/web and mobile applications. I'm savvy in Agile development, Source Control and Project Management. I like building REST APIs and cross-platform user interfaces.

How Can I Help You?

I design, prototype and build software. Mostly web applications and hybrid mobile apps. I can help you realize your startup idea, integrate your existing and legacy systems to streamline your business. Perform visual/interaction design, and proof of concepts. I also provide technical consultation, and teach short courses and workshops from time to time.

Basic Information

Birthday Apr 20 1988

Passport Number U34212707

Education

Computer Science, Bachelor (2007 – 2010)

Major: Software Engineering, Grade: A+

IUFS, Saint Petersburg Russia, through the Gulf Branch, Lotus Educational Institute

Software Engineering, Associate's Degree (2005 – 2008)

Sama technical college of Shiraz, Azad University

Recent Projects

analogue.DIGITAL (analogue.digital)

From Apr 2017 - Currently working

Title Senior Web Developer

Description

We're building an end-to-end platform with a REST API, an angular web app and a cordova mobile application. I've been responsible for design and implementation, testing, refactoring and optimization, research and everything in between.

Tags C#, Web API, EF6, Angular 1.6, TypeScript, Cordova 6

INO (blucation.com/inowebiste)

From Nov 2016 – Apr 2017

Title Lead Front-end Engineer, Project Manager

Description

I've been responsible for building a mobile app that sits between a REST API and a platform of smart devices and back-end systems. I also performed daily project management, issue tracking and documentation and everything else in between.

Tags C#, Web API, EF6, Angular 1.6, TypeScript, Cordova 6

Abish (abish.net)

From Dec 2015 – Jun 2016

Title Lead Front-end Developer

Description

I've been responsible designing and building a mobile app, plus maintaining server software. We created a location-based service (something like Uber). Research and automation was part of everyday work.

Tags C#, ASP.NET MVC, Web API, EF6, Ionic Framework
